**DETAILED ACTION**

***Election/Restrictions***

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 and 14 are objected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Terms in the claims which lack proper antecedent basis include: "the items" in claim 1. Claims 7 and 8 are misdescriptive because there is no drawer there can be no drawer slide or drawer slide guide.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 as presented, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Louis. Louis is cited showing a frame 1 with peripheral rails 1, 6 and transverse rails, slotted strips 2 are mounted to the cabinet and brackets 5 with u-shaped channels 8 and 8a support the frame and connect to a slide 3-4 that engages a

strips or guide. An invention is entitled to all the uses to which it can be employed therefore blood bags can be hung from the frame of Louis.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the structure that makes the guide "height adjustable" is missing.

***Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 9, as presented and 10-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Louis as applied to claims above, and further in view of Potter. Louis

fails to show height adjusting means for guides. Potter is cited showing a cabinet with slots 14 for the purpose of supporting guides at different heights. Since the references are from the same field of endeavor the purpose of Potter would have been obvious in the pertinent art of Louis at the time of the invention it would have been obvious for one having an ordinary skill in the art to have modified Louis with a cabinet with slots 14 for the purpose of supporting guides at different heights in view of Potter.
